

Objective

Dean's List Computer Science undergraduate with a strong foundation in software development, data structures, and system design. Interested in building scalable, responsible, and data-driven systems, and seeking internship opportunities to apply technical and problem-solving skills in collaborative environments.

Education

Bachelor of Science in Computer Science, Arizona State University (Graduated May 2026)

Certificate in Applied Business Data Analytics, Arizona State University (Graduated May 2026)

CGPA: 3.66

Masters of Science in Computer Science, Arizona State University (Expected May 2027)

Skills

C++, Java, Python, HTML/CSS, JavaScript, D3, SQL, Django, Pandas, Machine Learning, Data Visualization, Git, CRM Software, PowerBI, Tableau, Agile, Lean Six Sigma methodologies, MS Office

Relevant Coursework

Algorithms and Data Structures, Principles of Software Engineering, Operating Systems, Foundations of Machine Learning, Probability and Statistics for Engineering Problem Solving, Intro to Artificial Intelligence, Intro to Human Computer Interaction, Data Visualization

Work Experience

Project Coordinator Intern, Schweitzer Engineering Laboratories [March, 2026 - May, 2026]

- Developed an internal project management application using Microsoft Power Apps to centralize project tools, action items, RFIs, deliverables, and transmittals into a single platform.
- Designed and maintained relational Microsoft Dataverse tables to support efficient storage, tracking, and retrieval of project data across teams.
- Built Power BI dashboards and KPI visualizations to monitor project progress, overdue tasks, and workflow trends, improving visibility into project performance.
- Collaborated with supervisors and cross-functional stakeholders to gather requirements, test application functionality, and implement user-focused improvements.

Intern, Raptor Aero [March, 2025 - July, 2025]

- Developed and maintained the company website using modern web development technologies.
- Collaborated with team leadership to implement functionality improvements and enhance user experience.
- Contributed ideas and technical solutions during project planning and development discussions.

Projects

Deep dive into ML classification models - Individual project, Machine Learning class

- Executed a comprehensive machine learning project involving EDA, feature engineering, and evaluation of three classification models to identify the optimal solution for a real-world dataset. Conducted in-depth performance analysis to justify model selection, and developed a simulated deployment plan addressing scalability, maintenance, and ethical considerations.

Endless Moments LLC AI-driven budgeting suite - Team project, Computer Science capstone

- Developed an AI-powered budgeting and forecasting system designed for small to medium sized businesses to automate the budgeting cycle using historical and seasonal financial data and give intelligent real-time updates, accounting for different possible scenarios.
- Worked as the leader of the backend team and contributed to code integration and compilation.

Heart Disease and Diabetes Risk Prediction - Individual personal project

- Developed a predictive model to assess the risk of heart disease and early diabetes in patients based on clinical and demographic data using machine learning.

The Minimum Wage Scrollytelling - Team project, Data Visualization class

- Developed an argumentative visualization scrollytelling webpage that explores the minimum wage debate with the aim to make it tangible for non-experts by grounding arguments in real data and concrete narratives.
- Crafted the main narrative of the scrollytelling and contributed to the data collection and creation of the visuals.

Other Professional Development

Grader - Global Launch Program, Arizona State University

- Grading and correcting student work according to the rubric set, and providing insightful feedback to students to help improve their work.

English Teacher - High school, India

- Volunteered as an English teacher for underprivileged children through weekly online Zoom classroom.

AI Professional Skills Certification - The Global Career Accelerator

Python and Data Certification - The Global Career Accelerator

Querying Data Certification - The Global Career Accelerator

Volunteer - Lost Our Homes Pet Rescue

- Volunteered 20+ hours at Lost Our Homes animal shelter and carried out duties such as cleaning and customer interaction.
